Project Part 10   3%

__Question 1:__ (use schemas des02 with script 7clearwater)

     We need to know WHO, and WHEN the table CUSTOMER is modified.
Create table, sequence, and trigger to record the needed information.

Test your trigger!

__Question 2:__

     Table ORDER_LINE is subject to INSERT, UPDATE, and DELETE, create a trigger to record who, when, and the action performed on the table order_line in a table called order_line_audit.
     (hint: use UPDATING, INSERTING, DELETING to verify for action performed. For example: IF UPDATING THEN …)

Test your trigger!

__Question 3:__ (use script 7clearwater)

     Create a table called order_line_row_audit to record who, when, and the OLD value of ol_quantity every time the data of table ORDER_LINE is updated.

Test your trigger!
